About Fletco

Fletco Carpets A/S can look back on more than 70 years of development. It has led the business from the start as a small supplier of carpets to Danish consumers to the position of a supplier of carpets for the international residential and commercial market.

Fletco has roots in a region with a proud tradition of craftsmanship and industrial processing of textile products. This affiliation is important because it includes values of quality, diligence and precision. At the same time Fletco developed into a modern market and customer oriented company, where product development, technological re-thinking and efficient production are important keywords.

The future will mean stricter requirements for environmental awareness in production, and thus also in the final products. Fletco anticipated this development. The company's own laboratory ensures that the carpets fulfill requirements for internationally recognized certificates and tests, whilst also guaranteeing taking into account the demands of tomorrow.

Quattro

Flat woven manufacturing is not just low profile weaving, with Quattro we display some of the more complex designs that are also possible with our machines. Quattro is suitable for extra heavy commercial use, and has a high weaving structure and is available in 12 standard colours.

Uno

We are not afraid of colours!

Uno was developed on the premise that simple structure, combined with extraordinary colours, will give the architects the tools to create the perfect environment for the end-user. We offer 37 colours from stock and it is made with Ultron Nylon 6.6, which ensures strong and vivid colours. Uno is approved for extra heavy commercial use.

Sebastian Wrong by Fletco®

This colourful and imaginative carpet tiles concept gives our clients freedom to design a unique flooring solution to match their individual project perfectly, creating interesting effects within the specific context of the space and other interiors in the building.

The concept was developed from the idea of using an endless pallet of colours combined with a selection of geometric shapes that can connect and interlock to make many possibilities.

There are 18 attractive colours available and 9 different tile shapes.

C1, C2 & C3**

ZigZag-Tiles®

Carpet tiles, which look like a broadloom

The new ZigZag tile shape for our flat woven carpet tiles has been developed for our customers, who want flat woven carpet tiles and simultaneously want the look of a broadloom. Normally we always recommend that flat woven carpet tiles are installed in quarter-turn, but this does not give the effect of a fitted carpet.

When selecting our new ZigZag-Tiles®, our flat woven tiles can then be installed in the same direction: the tile bond of the tiles should be displayed by half a tile in the length direction, which means that a better homogeneous surface is achieved, the joints are less visible and the effect of a broadloom is obtained.

The advantages of the ZigZag-Tiles®:

- The tiles can be installed in same direction, thus an effect of a broadloom is obtained with minimal visible joints.
- Single tiles can easily be replaced, if for example liquid has been spilled on a tile.
- The quality is the same as our other flat woven carpet qualities.
- The tiles and the edges are laser cut, which guarantees a perfect fit and helps prevent fraying.

ZigZag-Tiles® are available in the size 50 x 50 cm and can be delivered in the following classic collections (produced to order only):

- Nordic
- COM 1000

LockTiles®

Carpet tiles with unique edges

The innovative and patented LockTiles® solution brings our flat woven carpet tiles yet another level up by giving the best within carpet tiles and their many advantages, and the exclusive look of a broadloom. The unique carpet tile shape guarantees an effective and perfect installation with a completely homogeneous surface making the joints less visible.

The laser cut edges interlock around each other and fit together in all directions – meter for meter, no matter the size of the area.

The advantages of LockTiles®:

- These carpet tiles cannot be installed incorrectly!
- LockTiles® ensure an effective and perfect installation.
- The tiles interlock and fit perfectly together.
- The tiles can be installed in same direction, thus a broadloom effect is obtained with minimal visible joints.
- Single tiles can easily be replaced if, for example liquid has been spilled on a tile.
- The quality is the same as our other flat woven carpet qualities.
- The tiles and the edges are laser cut, which guarantees a perfect fit and helps prevent fraying.

Thinking of the next generation

Creating carpets in a sustainable process

Fletco focuses on environmental issues in all our manufacturing processes, from cradle to cradle. Sustainability is key to all our product development. We lead the field and meet or surpass the authorities' official or certifying bodies' carpet manufacturing requirements. Wherever possible, we will engage in research and development into new methods and materials.

Fletco carpet tiles with TEXtiles® backing

One particular environmental problem that applies to carpet tiles generally is the backing, which traditionally contained PVC or bitumen. Thanks to new production technology, the backing of all Fletco carpet tiles is guaranteed free of these and other harmful chemical substances:

- Cradle-to-cradle and CO₂ reduction
- Backing made of minimum 60% recycled materials
- Eco-friendly – cradle-to-cradle – suitable for thermal disposal
- Ecological product – free of bitumen, PVC and other environmentally-critical substances
- Produced using CO₂ neutral energy (steam) and 100% wind energy
- Odour-neutral
- Permanently antistatic
- Fletco TEXtiles® are GUI approved "allergy-friendly"

Interior Design and Acoustics

Noise reduction is becoming an important issue in interior design in both office buildings and in the hospitality sector. It is all about creating rooms and areas not only for the eyes, but for the ears as well.

A serious approach to acoustics is of great importance for creating a comfortable environment for work, meetings, entertainment and relaxation.

It is a proven fact that poor acoustics leads to workplace dissatisfaction and has a direct impact on employee performance and physical well-being. Noise can cause both stress and frustration in office buildings and institutions - and when it comes to hospitality and entertainment, unwanted noise will have a negative effect on the overall experience.

Carpeting is one of the main tools to minimize unwanted noise - and Fletco will help you create rooms and spaces with a pleasant acoustics for working and experience.
